User list:

Dave is a senior obtaining a degree in data science. While he prides himself in his knowledge of class topics, Dave has a difficult time working in groups. He finds that it is hard for him to express his ideas to his group-mates, and his groups usually suffer because of this. Being shy ever since he could remember, the worst part for him was always getting to know his teammates and develop a strategy on how he and his team would communicate throughout their task together. He sometimes begins to feel shame, because his teammates tend to view him as lazy and as though he does not have good ideas.

Sara is a junior in college pursuing a career in Data Science. She loves spending time on campus and studying in the library. She values quiet time and listening to music by herself. Ever since she can remember, school group projects have stressed her out, as she is always weary of sharing her potential grade with other people she has never met.

Demographics
- Age: 20
- Gender: Female
- Location: Charlotte, NC

Motivations
- The ability to rely on others, whilst able to complete key tasks on her own.
- Structure: A guide and principals to help her and her team progress through the task at hand.

Frustrations
- Sara dislikes being grouped with others with no incentive to get to know one another outside of completing an important assignment.
- She wants to feel as if she can lead a group towards her desired outcome, however, she feels as if she can come across as bossy and feels as if it is her responsibility to keep her teammates in track

Feature List:

- viewable user profiles, giving detailed descriptions of the user and what they enjoy.
- User roles
- A Task board, where teammates submit ideas/tasks they believe the group should discuss.
- A team guided timeline, that will track and evolve the project as time progresses.
- Direct messaging capabilities
